

# INMATE POPULATION ON JUNE 30, 2004

## Inmate Population on June 30, 1994-2004

### Florida prison population jumps 6.0% since last fiscal year

Inmate population refers to the 81,974 inmates who were present in the Florida prison system on June 30, 2004. The following tables and charts will detail the characteristics of these inmates. Other fiscal years are also featured to illustrate trends.

- The number of inmates in prison rose 46.2% over the last 10 years, from 56,052 in June 1994 to 81,974 in June 2004. There was only a 19.5% rise in inmate population since 1999, but a hefty 6.0% jump from last fiscal year.
- The majority of inmates in prison on June 30, 2004 are male (76,675 or 93.5%) and black (42,572 or 51.9%). However, the percentage of black inmates in prison is decreasing (58.0% in June 1994 to 51.9% in June 2004.)
- The top five categories of primary offenses for which inmates are incarcerated are: drugs (19.5%), burglary (15.1%), murder/manslaughter (13.8%), robbery (12.8%) and violent personal offenses such

as carjacking and aggravated assault (12.2%).

- On June 30, 2004, 468 of every 100,000 Floridians were incarcerated compared to 443 in 2000.

### Inmates Incarcerated on June 30 (per 100,000 Florida Population)

47.0% of inmates in prison on June 30 had been in Florida prison before

Prior commitment refers to any previous occasion that an inmate served time in the Florida prison system. This does not include supervision, such as probation. Nor does it include inmates who may have been in county jails in Florida, in other state systems or in the Federal prison system.

- The number of inmates in prison on June 30 who had been in Florida prisons previously has increased 42.0% over 11 years from 27,133 in 1993 to 38,541 in 2004.
- The percentage of inmates in prison with a prior commitment continues to decrease, from 49.6% in 1999 to 47.0% in 2004.
- Of the 43,433 (53.0%) inmates in prison on June 30, 2004 who had no prior Florida prison commitments, 53.8% were white, 42.1% were black and 4.1% were other races.
- Of all inmates, 20.0% had been in prison in Florida once before, 11.2% had been in twice before, and 15.8% had been in three or more times before.

# INMATE POPULATION ON JUNE 30, 2004

Most of inmates (51.8%) in prison on June 30 were serving for violent crimes such as murder, sexual assault, robbery and arson.

A primary offense is the most serious crime for which an inmate was convicted and sentenced to prison, based on the statutory degree of the crime. It is called the primary offense because many inmates have multiple offenses for which they are sentenced to prison.

- Most (51.8%) inmates in prison on June 30, 2004 had a violent primary offense, including murder, sexual assault, robbery and arson.
- Drug offenders, those with primary offenses of sale, manufacture, purchase, trafficking or possession of drugs, comprised 19.5% of prison inmates.
- The most common categories of primary offense among inmates on June 30, 2004 were the sale, purchase or manufacture of drugs (10.8%), robbery with a weapon (8.4%), and burglary of a dwelling (7.2%).
- For inmates with a primary offense of murder or manslaughter, the average sentence length was 35.3 years and their average age at offense was 27.5 years. (Sentences of life, death and more than 50 years were counted as 50 years for these calculation purposes).
- The average sentence length for other primary offense groups was: 21.6 years for sexual offenses, 19.0 years for robbery, and 11.9 years for burglary.
- For prison inmates, robbery is the offense type with the youngest average age at offense: 26.0 years.

# INMATE POPULATION ON JUNE 30, 2004

## About 5.8% of Inmates in Prison on June 30, 2004 Committed their Crimes before they turned 18

- There were 4,741 (5.8%) inmates in prison on June 30, 2004 who committed their crimes before they turned 18. Their average age on June 30, 2004 was 23.8 years.
- 8,695 of the current inmates (10.6%) are 50 or older. That compares with 9.9% a year ago.
- 3,404 of the current inmates (4.2%) are under 21. That compares with 4.8% a year ago.
- The largest age group of inmates in prison on June 30, 2004 was ages 25 to 29 (16.1%), followed closely by ages 30 to 34 (16.0%) and ages 35 to 39 (15.5%).
- The youngest person in state prison on June 30, 2004 was 15 years old and the oldest was 91 years old.
- As you can see from the table to the right, there were 214 inmates in prison on June 30, 2004 who were still 17 or younger. Of those in prison on June 30, 2004 who were still 17 or younger, the following was their age at offense.

Inmates 17 and Under on 6/30/04

Age at Offense	Number	Percent
12	2	0.9%
13	6	2.8%
14	41	19.2%
15	67	31.3%
16	86	40.2%
17	12	5.6%
<b>Total</b>	<b>214</b>	<b>100.0%</b>

- This chart below shows that the number of inmates who are 17 or younger continues to decline, while the number of older inmates (ages 50 and over) in prison on June 30 of each year continues to climb.

Number of Younger Inmates Declines as Number of Older Inmates Increases

## Slight Decrease in Numbers of Inmates Suffering from Mental Disorders

### Male Inmates with Mental Disorders on June 30

Generally accepted epidemiological studies indicated that between ten and twenty percent of the mentally ill in state and federal prisons suffer from serious mental disorders. In Florida, about 16% of the inmates receive ongoing mental health care.

Mental health grades range from S-1 to S-6. S-1 (Normal) grades indicate no significant mental health problems are present. Inmates may need only episodic outpatient care and/or crisis intervention. S-2 grades (Mild) indicate the inmate needs ongoing services of outpatient psychology either intermittent or continuous. S-3 (Moderate) indicates inmate needs ongoing services of outpatient psychology (case management, group and/or individual counseling, as well as psychiatric or psychiatric Advanced Registered Nurse Practitioner (ARNP) care). Clinical management may require periodic administration of psychotropic medication, although the inmate may exercise her/his right to refuse the medication. S-4, S-5 and S-6 grades (Severe) indicate inpatient mental health services in a transitional care

unit (TCU), a crisis stabilization unit (CSU), or an assignment to the Corrections Mental Health Institution (CMHI).

- Over a five-year period, the percentage of the prison population without significant mental health problems has remained relatively stable and risen slightly in the past year: 85.0% in 2000; 84.7% in 2001; 84.1% in 2002; 82.8% in 2003; and 84.0% in 2004.
- During that five-year period, the percentage of women falling into the moderately impaired category has fluctuated, with a recent major decline: 33.1% in 2000; 31.5% in 2001; 36.4% in 2002; 41.6% in 2003; and 27.2% in 2004.
- In comparison, the number of males considered moderately impaired has remained relatively stable with a slight decrease in the last year: 9.1% in 2000; 9.0% in 2001; 9.3% in 2002; 9.8% in 2003; and 9.3% in 2004.

### Female Inmates with Mental Disorders on June 30

# INMATE POPULATION ON JUNE 30, 2004

## Most Confirmed Alien Inmates (59.6%) in Prison for Violent Crimes

### What is an alien inmate?

An alien inmate is one who does not have U.S. citizenship. Newly admitted inmates are referred to Immigration and Customs Enforcement (ICE, formerly part of INS) agents, working in prison reception centers, who identify and investigate those who may be aliens. On June 30, 2004, Florida prisons held 4,850 confirmed alien inmates.

### What happens once alien inmates finish their prison sentences?

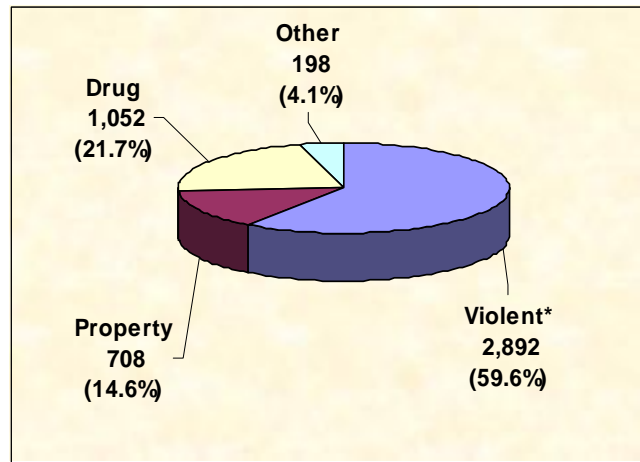

As with other inmates, alien inmates are released from prison when their sentences are completed. If the ICE has notified the Department that they will take an alien inmate into custody, the inmate is released into ICE custody. Some alien inmates cannot be deported. However, the majority of alien inmates who complete their sentences in Florida prisons are released to ICE for further immigration processing, including possible deportation.

### Under what circumstances would an alien inmate be deported?

Alien inmates are deported promptly after release from prison, if they have been ordered out of the country, have no further appeals of their final deportation order, and are from a country to which the United States can deport them. Other alien inmates are transferred to ICE for further deportation proceedings when their sentences expire, unless ICE refuses to receive and detain them (for example, in some cases when the alien is from a country to which they cannot be deported).

- Most confirmed alien inmates (59.6%) in prison on June 30, 2004 were serving time for violent crimes.
- Over one fifth (22.4%) of confirmed aliens were serving time for murder or manslaughter, and (21.7%) were serving time for drug crimes.
- Cuba is the single country with the largest number of confirmed aliens in Florida's prison system (37.2%) on June 30, 2004.
- Mexico (13.5%) and Jamaica (9.2%) together account for about one of every five aliens in Florida prisons.
- Honduras, Nicaragua, the Bahamas, the Dominican Republic, Guatemala, El Salvador, and Canada accounted for (14.6%) of confirmed aliens in Florida prisons on June 30, 2004.

Primary Offense of Confirmed Alien Inmates on June 30, 2004

\* One of the following conditions must occur for a crime to be defined as violent under this definition: actual physical harm or threat of physical harm, or a reasonable probability existed that individual criminal acts could have resulted in unintended physical harm or the threat of physical harm.

# INMATE POPULATION ON JUNE 30, 2004

## Sentence Length of Current Commitment

- More than one-fourth (26.9%) of current inmates have sentences of three years or less.
- Whereas the AVERAGE sentence length of current inmates is 14.6 years, the MEDIAN sentence length (same number of inmates with sentences above and below that number) is 7.0 years.
- Over three-fourths (76.2%) of current inmates are serving under the 85% law, which means that for crimes committed on or after October 1, 1995, the inmate has to serve at least 85% of his or her sentence.
- The largest category of sentence length for current inmates is "greater than one year, less than two" (12,273 or 15.0% of the inmate population on June 30, 2004). This category is followed closely by "greater than two years, less than three" (9,763 or 11.9% of all inmates) and those with Life or Death sentences (9,298 or 11.3% of all inmates).

## Over three fourths of all inmates serving 85% of sentences

Offenders who committed their offenses on or after October 1, 1995 are required to serve a minimum of 85% of their court-imposed sentence prior to their release. On June 30, 2004, over three fourths (76.2%) of all inmates in prison had been sentenced under this law, mean-

ing they will serve at least 85% of their sentences, and that number continues to increase annually. The average percentage of sentence served for released offenders has risen steadily in the last six years, from 77.9% in June 1999 to 84.9% in June 2004.

## Median Grade Level Achieved by Inmates Tested Was 7.3

Periodically inmates are tested to determine their educational grade level in the form of a school grade level. The table on the right shows the grade levels for the most recent TABE scores of the inmate prison population on June 30, 2004, which is the last day of the fiscal year. Inmates with unavailable data were not included in the analysis.

- Of all scores analyzed, the median test score (half the scores were above and half were below this score) was 7.3, compared with 6.4 for inmates who were admitted to prison in FY 2003-04.
- The tested grade level achieved most often (13.3%) was the twelfth grade, compared to a tested grade level of fifth grade (13.5%) for inmates admitted in FY 2003-04.
- The table below groups the grade levels of the June 30, 2004 prison population into three different categories: basic literacy, functional literacy, or GED Prep. Again, inmates with unavailable data were not included in the analysis.
- Six of every ten inmates who were tested on June 30, 2004 (62.1%) had not achieved GED Prep literacy skills (scored less than the ninth grade level).
- Almost thirty-eight percent (37.9%) had GED Prep literacy skills (ninth grade literacy skills or better).
